Pedersen Realty Website Homeowners Association Options

Option One

Password-protected HOA pages

1. Create a unique password protected page for each HOA
2. Distribute password to whomever needs access

Pros:

- Simple to setup new HOAs

Cons:

- A new password must be generated and distributed when an HOA member with access leaves.

Option Two

Require individual users to register and login to view private HOA-specific page(s)

Pros:

- Access is controlled at the user level. Access can be revoked at any time without affecting the other HOA memmbers.
- Content may be more secure.

Cons:

- There are additional steps required to authorize users and to make content private.

Registering Users

Option One

HOA members register online

1. Clicks Register link on the Login page.
2. Fills out and submits info form.
3. System sends Pedersen Realty a New-User Notification by email.
4. Pedersen Realty reviews the request and, if warranted, the user is enabled and is assigned to an HOA.
5. The system sends an email to the user indicating that their account is now active.

Option Two

Pedersen Realty sets up new users manually

1. User can fill out an online login request form to obtain login credentials.
2. The system emails the form to Pedersen Realty.
3. Pedersen Realty sets up the new user by assigning a username, password and HOA.
4. The system sends an email to the new user with his or her login credentials.
